Environmental Policy

Kernow Coatings recognises that our operations have an effect on the local, regional and global environment.

As a consequence of this, the Directors and management are committed to continuous improvements in environmental performance and the prevention of pollution.

Environmental laws, regulations and codes of practice will be regarded as setting the minimum standard of environmental performance.

We will implement our policies through a co-ordinated environmental management system.

We will encourage and inform our employees to conduct their daily work practices in a safe and environmentally responsible way. We will encourage ongoing feedback and consultation with all employees.

The Company considers the environmental impact of its products at all stages of their life cycle from research and development, to manufacturing, customer use, and final disposal.

We aim to conserve resources through efficient use and careful planning.

The Company will assess the energy efficiency of production, and all other areas where we can make savings. With a view to improvement and, if appropriate, investment.

We are currently mitigating our 'Carbon Footprint' by financing the planting and lifetime care of trees in the South West of England.

The Company maintains that a primary part of its environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible. We also encourage supplier take-back.

We will dispose of all waste through safe and responsible methods, using only competent, authorised agencies.

The Company will set environmental targets and goals designed to improve our environmental performance.

We will assess and review our work practices and safety policy to reduce the risk of any accidental release of pollutants, to ensure such a release is contained, and contamination of the local environment prevented.

We will conduct an annual review of our performance in implementing these principles and in complying with all applicable laws and regulations.
