KERNOWJET METALIK® PERMANENT

With its permanent high-tack adhesive, KernowJet MetaliK® Permanent is your perfect partner for lamination on a extensive range of smooth substrates or can be used for wallcoverings. It is ideal for 3-D labels/doming applications and a wide variety of permanent applications. The back of the film is silver regardless of the front-face colour.

WHY CHOOSE US?

KernowJet MetaliK films are designed to fulfil all requirements of the Sign and Wide-Format Printing industry. KernowJet MetaliK can be applied or laminated manually or mechanically, with wet or dry application techniques. Applied to perfectly smooth substrates like glass, the films have a mirror look finish. On demand, we can create specific metallized colours in different shades, for example metallic red, blue, and green. Imagination is your only limit.

FEATURES

- High-tack permanent adhesive
- Turns any smooth surface into metallic
- Perfect for laminating to boards
- Very smooth finish, close to a mirror effect
- Corrosion free – 3 years outdoor UV stability
